

Seal-e-Zee Speciality Cone Kit

The Seal-e-Zee Speciality Cone kit has been modified from an original kit to make fitting GM5L40E pistons even easier.

The second largest cone has been precisely cut to make smaller cones that can be used together on each piston. This allows for all lips of the piston to be sprayed in one go, making installation easier than ever. At the same time using less spray product and saving money.

The remaining cones can be utilised by the rebuilder when faced with new problem pistons.

The Speciality kit is the perfect compliment to your original set of cones.
